Justification and Approach

The program has an operational Multi-Advisory Committee whose purpose is to assist in the planning, operation and evaluation of all areas of the Head Start Program. The Advisory assists in the planning of the four components for the upcoming year by reviewing and providing input into the policies and procedures utilized to govern the program. The Multi-Advisory is utilized throughout the program year as new directives of compliance are issued. Various members of the committee also participate in the end of the year program evaluation using the On Site Program Review Instrument which determines compliance or non-compliance with the Head Start Performance Standards. The committee is made up of parents and professionals from various fields. The committee meets twice a year, with subcommittees and additional meetings, as needed.
